ABOUT

Hello. I'm a MERN stack developer, but my main role is as a front-end developer. I have 1 year of experience as a Front End developer. You can find out more about this in the "Work Experience" section.

Briefly about yourself:

My name is Obidjon, I am 18 years old. I started programming in 2021. Since I was interested in computers from a young age, my parents took me to programming courses, and I am still interested in working in this field.

My interests:

- Sports (Football),
- Teamwork,
- To walk,
- Travel to foreign countries

I have a good work ethic and adapt easily to different projects. I try to complete the tasks assigned to me ahead of time. I like to learn something new in my free time. If I don't know how to do a task, I ask Google or people older than me and try to do it perfectly.

EDUCATION

Front End Developer

2021 | Company iCode Academy

MERN STACK

now | Youtube, Google

EXPERIENCE

- **2021 Front End Developer || iCode Academy**
 - Since I did well in this training center, I was hired as a teaching assistant and front-end developer. There I expanded my knowledge by teaching students. And of course I worked there with real projects. For example, an advertising agency website, an online magazine, online appointments with doctors, and similar projects. Thanks to these projects, I learned how to work with a team and get data from the Back End correctly.
- **2022 Front End Developer || GXSupport**
 - This company is located in Tashkent, where I further strengthened my knowledge. I enjoyed working with a strong and united team. I mastered new technologies and worked comfortably there, and I am grateful to them for that. I left this company because I have school.

SKILLS

HTML, CSS, JavaScript, TypeScript,
React Js, MUI, Next JS, Node JS, Mongo DB,
Git Hub
